

EYEGLOSS CASE CRAFT FOR SENIORS

MATERIALS NEEDED

- Pot Holder
- Needle and Thread
- Glue Stick and Glue Gun
- Buttons
- Stickers

CRAFTING THE CASE

Follow along as we give you the step-by-step process on how to create your own Eyeglass case out of pot holders. Make sure to pay attention and remember the important parts!

1. Fold the Pot Holder. Fold the pot holder in half so that the inside (soft side) will be the interior of the case. Use clips to secure the fold. Make sure to evenly fold the pot in half to avoid imbalances in your finished product later on.

2. Stitch the Sides. Sew the folded pot along the edges. Leave the folded edge and the opening of our eyeglass case unstitched. If stitching is a little dangerous for your beloved seniors, you can use hot glue as a replacement.

3. Decorating the Case. It's time to let your seniors' creativity take over the craft! Ready the materials and get started. Glue buttons, old jewelry, or any decoration you want for the craft.

4. Check the finished product. Get your eyeglasses and try to put it in your DIY Eyeglass Case! Let seniors showcase their finished product by having a mini-exhibit or a quick photoshoot to commemorate their simple but elegant artwork.
